### **K) AUTOMATED DECISION MAKING**

Automated decision-making means making decisions about you using no human involvement e.g. using computerised filtering equipment. No decision will be made about you solely on the basis of automated decision making (where a decision is taken about you using an electronic system without human involvement) which has a significant impact on you.

Decisions based on automated decision making include:

- a) Time Attendance System
- b) Payroll

The TA system is an electronic method to record the number of hours worked by Standwalk employees.

The TA system uses a web-based rostering system, with the use of a touch screen terminal. Using a small key fob, staff clock in and out each shift they work.

The TA system allows staff to view the hours recorded and what their shifts are for the next seven shifts. Staff can also request holidays using the touch

screen, which their manager can then inform the staff member if they have been authorised.

If staff are early or late, they can enter a reason for this, which is then reviewed by their manager.

At the end of the pay period, these hours are used to calculate the payroll.

All managers review the TA system regularly to ensure staff are using their fobs to record when they have arrived and left work.

Managers complete the TA confirmations on a very regular basis, preferably every day.

Managers check and authorise the payroll weekly.

- e) The right to transfer the data we hold on you to another party. This is also known as 'portability';

Withdrawing your consent means that we will stop processing the data that you had previously given us consent to use. There will be no consequences for withdrawing your consent. If you wish to exercise any of the rights explained above, please contact a member of the administration team.
